Alerting Abstract: SU A

Apparatus for applying anastomoses to hollow organs has a tubular body joined to a removable staple head with a pusher and a knife, a rod, a removable stop head with lunes for bending staples which is joined to the rod, a suturing gap selection mechanism and suturing drive.

In order to assure suturing outside the zone of the purse string suture, between the stop head (5) and the staple head (2) there is a washer (6) which can be fixed to the rod (4). In addition, in the rod (4) there are through apertures (7) which are used in fixing the washer (6). Bul.6/15.2.83
